ISO 3-4 (Class 1-10)

Valutek Butterfly Mop Systems

Part Number: VTBFMH

Valutek's cleanroom butterfly mop system is manufactured with a low-profile aluminum swivel head and adjustable **stainless-steel** handle. The mop is designed to ensure effortless maneuverability, making it ideal for hard-to-reach areas like corners, ceilings, walls, and other confined spaces.

The mop system is compatible with Valutek's standard non-woven wiper series (VTSNTR) and 2-ply polyester wiper series with an ultrasonic seal (VT2PNWUS) for appropriate cleaning compatibility within a wide range of cleanroom environments.

All Valutek mop systems undergo testing and are manufactured in ISO compliant facilities under Valutek's inspection and rigorous process control to maintain Valutek's high-quality standards and product specifications.

Features

- Crafted from electro-polished stainless steel, plastic, and aluminum, and is packaged in a cleanroom environment.
- The mop head's flat design slides easily and allows for full, uniform contact with surfaces for enhanced cleaning efficacy
- Uniquely designed butterfly clips secure the mop wiper cover in place.

Application

As part of the **Valutek NanoTek product family**, this product is recommended for use in a cleanroom **Class 1-10 (ISO 3-4)** critical environment. Mop wipe head selection will determine actual cleanroom classification compatibility.

The butterfly mop system is compatible with a range of wiper substrates, sizes, and cleaning solutions, making it ideal for wet and dry mopping of floors, ceilings, and walls in controlled environments.

Non-woven mop wiper covers are ideal for environmental and general facility cleaning, while the ultraclean and highly absorbent 2-ply polyester mop wiper covers are designed for more critical cleaning applications.

Packaging

- 1 each /case.
- Critical environment compatible.
- Part number and lot number traceable.
